

Technological  
innovation, experience and  
craftsmanship  
for advanced surgery

SINCE 1965  
40  
DUFNER QUALITY INSTRUMENTS

... observe, consult and develop

has always been our maxim. Recognising trends early, developing practical solutions and translating these into innovative products. To achieve this, we are in continuous contact with experts throughout the world. We take their surgo-technical requirements and develop them into practical, need-based products, which enjoy broad acceptance by surgeons everywhere. We constantly seek expert appraisal at all stages of our development, to ensure that our products are those which our market needs.

Our goal always is to offer our users significant advantages through our technically balanced product concepts, to reduce risks and to make surgical interventions as simple and efficient as possible, both in the interests of the surgeons and for the health of the patients.

 **DUFNER**<sup>®</sup>  
Instruments

*Even today, the manufacture of surgical instruments still calls for the skills of craftsmen, experts with the instinctive ability required to produce high-load instruments which combine delicacy and balance.*

*This highly skilled work, using modern production techniques, top quality materials and the latest technological know-how form the basis of all DUFNER instruments.*

*As a result, our customers have all the advantages offered by instrumentation of the highest level.*

*All our production processes are fully documented and monitored by a certified QM System, utilising strict control measures which guarantee that DUFNER products will always be of world-class quality.*

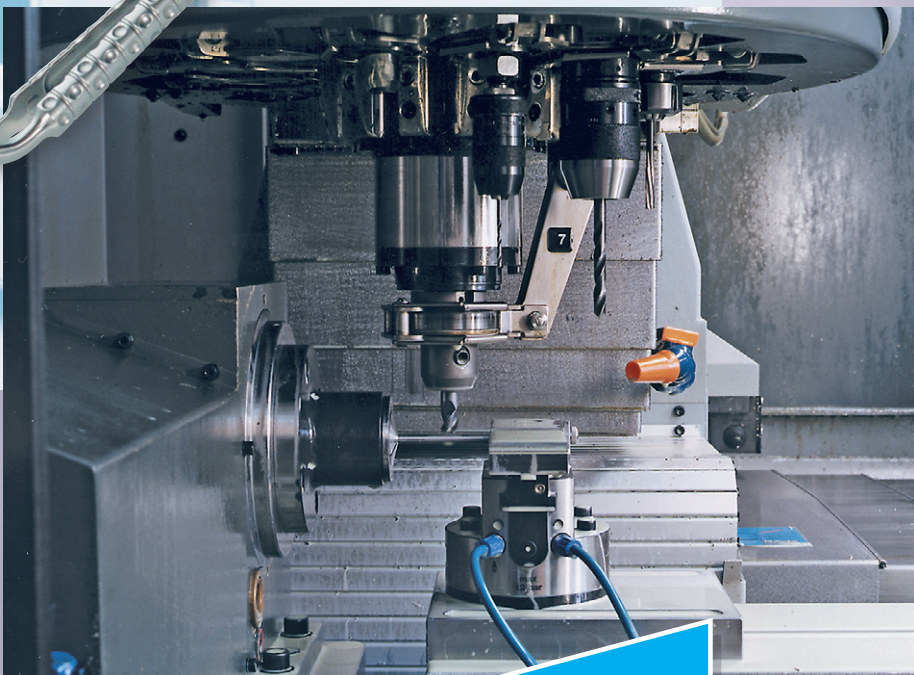

**Certified production according to international standards**

*There are technical catalogues for all the different product ranges which show very clearly the features offered by our products. A policy of continuous updating ensures information which always reflects the latest state of the technology available.*

 **DUFNER**<sup>®</sup>  
Instruments

*DUFNER has been active as a manufacturer on the international market since 1965 and during that time, has established itself as a reliable partner both for specialised traders and users. The foundation stones of this success have been consistent product quality, close partnerships with our users and in particular our market leading Research & Development. All this was initiated by the founder of our company, Helmut Dufner, himself a master surgical instrument maker, who succeeded in setting just the right innovative tone for the enterprise and in bringing the company to the position it enjoys today.*

*And we see ourselves continuing this tradition of being a reliable partner on the world stage for surgical instruments far into the future. As well as producing instruments for traditional open surgery, the DUFNER programme also covers complete MIS systems.*

*Our Production facility in  
Stockacherstrasse, Tuttlingen*

*Our Sales & Administration offices  
in Föhrenstrasse, Tuttlingen*
